About Mike Hagen

Mike is an accomplished photographer well known for his intensity, energy and enthusiasm. When you participate in a workshop with him, you will be pleasantly surprised by his generosity and infectious enthusiasm for imparting his knowledge to all participants. He has owned and operated Out There Images since 1998.

Digital photography with Nikon's spectacular new D70 digital SLR! It is an incredible amount of fun, but learning how to master its powerful capabilities can be an overwhelming task. Let **Out There Images** help you navigate the D70's setup screens, exterior controls and flash system to make the camera perform how you want it to perform.

Workshop Description

We start our day right off at 8am with a Power Point™ presentation. We cover the camera's main dial operations, menu controls and custom function screens.

After the morning classroom session, we head outdoors for a field work session. Our goal is to utilize the tools we learned in the morning to create stunning images in the real world.

After the outdoor field session, we go back to the classroom to download our pictures to desktop and laptop computers. We will use

Nikon's software to review our photos, critique them for improvements and also learn image optimization.

Excellent Instruction

During the entire session, you will be under the direct tutoring of **Mike Hagen**. He will guarantee that you learn what you need in order to succeed. His entire goal is to make sure you are fundamentally comfortable with your camera, and he won't rest until you have mastered it.

You can feel confident in Mike's abilities as a D70 digital photography instructor. He has been using digital for years and knows how frustrating and difficult it can be to get over the steep learning curve. Rest assured that he fundamentally understands digital technology and is fully capable of teaching you.
